

LMU MUNICH MEDICAL INTERNATIONAL

Ultrasound courses for medical professionals

ADVERTISER'S CONTENT

LMU Munich Medical International (LMU-MMI), a subsidiary corporation of LMU Munich University, started its first training courses at the LMU Ultrasound Training Academy Dubai in November 2006. The Ultrasound Academy is a 6,000 square foot training facility that provides interactive and computer based ultrasound training courses to medical professionals and sonographers from the Middle East, Asia, Africa and Europe.

Sonography is a rapidly expanding field of medicine and quality of training is crucial in order to achieve excellent results. Hence it is not surprising that the Middle East region in its thrive for world class medicine is investing in this area. In the Ultrasound Academy LMU Munich University conducts courses in abdominal and vascular, obstetrical, soft tissue, and trauma-ultrasound as well as in echocardiography. Courses in contrast enhanced ultrasound and paediatric ultrasound will be conducted next year.

The unique teaching methods

With the opening of the Ultrasound Training Academy in Dubai, Munich University Medical Centre has established a training facility that brings German knowledge and quality in diagnostic ultrasound to medical professionals in the Middle East

used at the Academy draw from the longstanding experience of the German LMU faculty. Interactive small group teaching sessions with patients or volunteers wherever possi-

ble is one of the most important features of the ultrasound academy. Being provided with the latest high-end technology and equipment from Siemens Medical Solutions the par-

ticipants are always at the forefront of the technical development in ultrasound imaging. In the courses the clinical relevance of ultrasound is also related to other diagnostic imaging modalities such as CT, MRI, and X-Ray Cardangiography.

Training programs

The training programmes are accredited by Harvard Medical School Dubai Centre (HMSDC) Institute for Postgraduate Education and Research. Participants receive CME credits and a certificate which follows the German or where applicable European Guidelines for Certification for the specific course level.
